

## End-to-End Fleet Management Solution

Whether you are computerizing your fleet for the first time or looking to replace an older legacy system, Bahwan CyberTek's Fleet Management System (FMS) will make your task easier...now and the long run.

FMS from BCT, has been designed to provide you a feature-rich, integrated system that works the way you do. Even a computer novice can get the program up and running quickly and produce measurable results.

FMS is a web-based, flexible, off-the-shelf solution for professional fleet management and vehicle monitoring.

The solution addresses business critical requirements of the transportation industry having different types of fleet equipment such as Light Motor Vehicles, Light Duty Vehicles, Heavy Duty Trucks, Prime Movers with Trailer combinations like Low bed, flat bed, Water Tankers and Chemical Tankers, forklifts, cranes, and other related equipment.

"State-of-the-art, user friendly, feature-rich, intuitive, technically superior and supported like no other program" is how people describe the Bahwan's Fleet Management System.

FMS is an enterprise software application aimed at providing a web-based fleet management solution. It offers all the information about the fleet using a common user interface. It provides excellent functional flexibility through well-defined and independent components for customization.

FMS has been designed to be scalable for organizations with thousands of fleet.

### FMS Benefits

- A quicker and more accurate invoicing of the services
- Increased efficiency of the fleet Better Asset Utilization
- Complete Process Automation for Fleet Operators
- Low cost of ownership for Fleet operators
- Reduced Operating Costs

- Increased Productivity
- Improved process workflow
- Increased transportation capacity and efficiency
- Lower vehicle and fuel costs
- Improved customer service through seamless and error-free communication
- Higher Customer Satisfaction

### FMS Features

BCT's Fleet Management Solution (FMS) presents an extensive array of features to help manage vehicle fleet. FMS can address the needs of both large and small businesses, and offer each customer with the required set of features, at the right price. The common focus throughout our product line is fleet operations and management, which includes preventive maintenance for fleet.

### Operation Module

#### Vehicle Availability & Inspection

Tracks availability of vehicles from internal and external suppliers. Vehicle inspection details are generated for the purpose of quotation.

#### Route Plan

Various route plans are generated for each vehicle.

#### Driver Schedule

Availability and scheduling of drivers is made possible through this module.

#### Vehicle Life Planner

The vehicle is tracked from its purchase up to its retirement. Vehicle's capacity utilization and related insurance costs are also maintained.

#### Maintenance Module

#### Workshop

Maintains the list of vehicles currently under repair,

E

# SYSTEMS

ready for utilization, expected delivery period of repaired vehicles, spare parts & components.

## Preventive Maintenance

Provides information on status of preventive maintenance of all vehicles. Also generates alerts for preventive maintenance on a periodic basis.

## Warranty Maintenance

Maintains complete information on vehicles under warranty, spare parts under warranty and warranty maintenance schedules.

## Commercials Module

### Contracts

Maintains the database of contracts with clients/vendors - including vehicle subcontractors and the reviews required for the same.

### Purchase Order

Used not only to place hire orders for vehicles but also to generate Purchase Order for generic item suppliers, capturing the delivery date and the terms. Also caters to the different organizational requirements on purchase of necessary items.

### Costing

Generates cost planning for a particular contract based

on vehicle availability, route plan & capacity planning.

## Claims

Maintains the database of all claims that arise out of shipment and during transportation.

## Billing & Invoices

Provides a flexible online billing/invoicing to all contracts on a need-to-furnish basis.

## Quotation

Generates customized quotations for all contracts. This module has a provision of modifying/ deleting quotation parameters.

## Order Entry

Maintains the sales order for booking vehicles against customer needs that can also be generated, based on quotations. This OE feature permits multi-company operations where the companies can be divided into divisions, and divisions into departments, while departments can have various locations.

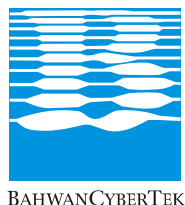

## Integration Module

The system is integrated to Oracle e-Business Suite Financials module
