

Bahwan CyberTek's

Apps Practice

Overview

BCT is a leading Oracle Partner, with rich experience in consulting and implementation of Oracle solutions. The dedicated teams of professionals have a good blend of functional and technical skills, with full lifecycle implementation experience in Oracle Application Suite. With strong in-house training capabilities and infrastructure on Oracle Applications, our offshore capabilities include production/maintenance support of Oracle Applications Suites.

Our service offerings focus on building value-enhancing partnerships for high-value, client-driven, timely and effective business solutions. Our Oracle Application Practice is driven by customer business imperatives, focused on time and cost advantages and founded on controlled and predictable processes. Whether you are looking for Business Process Re-engineering, Architecture Design, Technology or Systems Integration Services on the Oracle Platform, you will find our consultants highly competent, professional and result-oriented.

BCT offers excellent, qualitative and cost-effective consulting and implementation services on Oracle Applications. Our practice Differentiators are

Our Value Proposition

We offer excellent, qualitative and cost-effective consulting and implementation services on Oracle Applications. Our value proposition includes the following:

Re-Implementation Services

BCT offers Re-Implementation Services to Organizations who have experienced problems in their current implementations.

Trained and Certified Professionals

Our Oracle Practice Team consists of trained and certified professionals, who possess rich functional experience and technical skills with full life cycle implementation experience on various key modules of Oracle E-Business Suite.

Functional & Technical Resources

BCT has a large pool of functional and technical consultants on Oracle Applications, based at its Offshore Development Center, Chennai, India, which is a Global Delivery Model. Apart from the Offshore Team, Senior Consultants and Project Managers are based at various operating locations, addressing the on-site activities for clients.

Project Management

Certified Project Managers with rich experience in handling large scale projects (complex multi-org implementations, multi-company, multi-locational implementations) using Oracle's Application Implementation Methodology, with excellent project management capabilities, ensure timely completion of projects within the budget.

Migration Services

Our Apps Team has expertise on Version Migrations of various releases of Oracle Applications.

Infrastructure Facilities

We have a state-of-the-art Offshore Development Center

in Chennai, India. The center is ISO-9001 Certified and the processes are aligned to SEI-CMM Level-4. The center has excellent infrastructure facilities with latest releases of Oracle Applications, available for offshore activities, demonstration & training. We also offer Post Implementation Support for customers using Oracle Applications, under a Service Level Agreement.

Remote DBA Services

Our skilled DBAs have experience and expertise in providing Remote Database Administration Services to various clients.

Corporate Training

BCT offers Oracle Applications Training for Corporate Users.

Oracle Expertise

Professionals and Subject Matter Experts

Our Apps Practice Team is comprised of highly experienced and skilled professionals. The team includes Financial Professionals (Chartered Accountants, ICWAs, ACS), MBAs and Engineers. These professionals possess rich experience in specific industries and perform the role of Subject Matter Experts.

Project Managers

Project Managers with more than 10 years of experience in various cross functional projects and with full cycle Oracle Applications Implementation projects including large and complex group implementations.

BizTech Consultants

Applications Consultants (techno/functional) with rich functional/technical experience with more than one full-life cycle implementation projects.

Database Administrators

Oracle Certified Professional DBAs strengthen the team with relevant experience in Installation, Upgradations, Trouble-shooting, Database Tuning, Disaster Recovery Procedures, System Administration, etc. in Apps Projects.

Quality Assurance Team

The QA Team periodically inspects and audits the project activities and ensures quality in all the deliverables to our clients.

Oracle Developers and Tech Consultants

Our offshore development center has a large pool of Oracle Leads, Analysts and Developers, who complement the Oracle Apps Practice Team, in addressing the critical business requirements of our clients, by providing customized and extended solutions, legacy application integration, reports development & customization, etc., by following Oracle Applications development standards.

Some of our accredited customization / extensions:

Quick Invoice Module

Quick Invoice Module helps Organizations implementing Oracle Applications, to capture the cash sales transactions and generate cash invoices quickly without going through the lengthy process of Order Entry / Order Management Module. A cash invoice takes just a minute to prepare and generate. This module is well integrated with Oracle Distribution modules. This module also resolves the decimal entry problem existing in Oracle Applications 11.0.3 Order Entry module.

APPLICATIONS

Bahwan CyberTek's Apps Practice

Banking Module

We developed a Banking Module which addresses the business requirements with regard to Letter of Credit, Bills for Collection, Forex exposure, etc. with excellent pre-bundled reports. This module is well integrated with Oracle Financials & Distribution modules.

Landed Costing Module

Calculating landed cost for the received consignments is extremely important and essential for Organizations, especially Trading Organizations, who are striving to be competitive in their prices in the market place. The Landed Costing Module developed by us helped large business houses, who have implemented Oracle Applications, to address the landed costing requirements and derived greater business benefits.

Our Focus

Being a leading e-commerce partner to Oracle, we, at BCT, have very strong focus on Oracle Tools and Technologies apart from implementing Oracle Applications. We never compromise on our customers business requirements and hence we do not limit our services to only "product configuration". We ensure that the critical business needs are met by our technological and functional expertise. The following are the key factors for our focus on Oracle E-Business Suite:

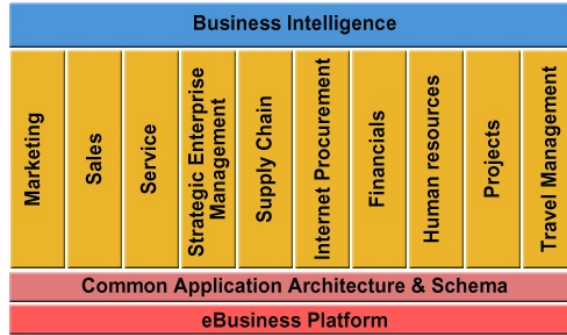

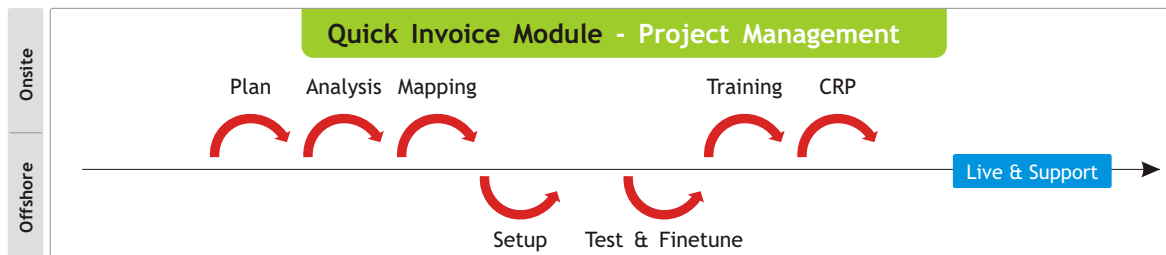

- Oracle E-Business Suite is the only complete e-Business suite of applications that is 100% web enabled. The solution is complete, simple, and is designed to get Organizations moving at internet speed.

- The E-Business Suite covers and unifies the complete functions of an Organization, from marketing, sales, and procurement to manufacturing, supply chain, and service-to financial operations, project management, and human resources-to business intelligence systems
- It helps the Organizations to leverage the power of internet which results in improved efficiency, reduced costs, expanded market space, and customer retention.

Oracle E-Business Suite

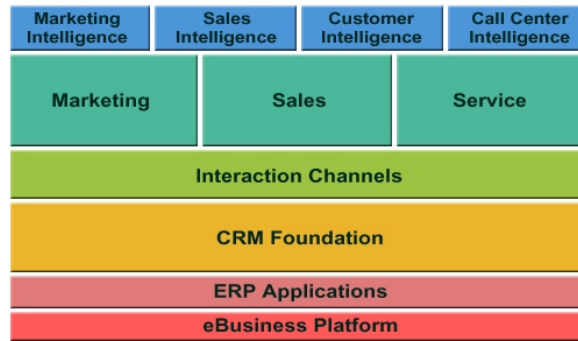

Oracle E-Business Suite provides end-to-end solutions to address the demanding business needs. Please see the snapshot of the solution components below:

The solution functions are as follows:

Our Services

Our Apps Practice offers various services which include, but not limited to the following:

Methodology

End to End Oracle Apps Practice	Consulting	Business Process Re-engineering Package Selection Consulting Solution Architecting
	Implementation	Business Requirement Study (RDD) Configuration of Oracle Applications Training & Deployment
	Q&A and Support	Health Check Review & Assessment Applications Support Applications Systems Administration Support Database Administration Support
	Migration	Migration of 10.7SC to 11i or 11x to 11i Migration of Customizations Data Migration of Legacy data to Apps
	Enhancements	Custom Development of Forms Reports Customization Integrate third party products

We adapt Application Implementation Methodology (AIM) of Oracle Corporation in all the Apps Implementation Projects. In order to make the services cost-effective and ensure quality deliverables, we apply an Onsite-Offshore combination by identifying and carrying out the onsite and offshore project activities.
